

COPY CONSTRUCTOR

SEC 2.11 Ezust

Class Name (const ClassName& x)

ASSIGNMENT OPERATOR

Class Name& operator = (const ClassName& x)

chapter 2 / example 2-16 to 2-18 

FROM 6.6

chapter 6 / copy-assign

TEMPLATES

classes

functions

DECLARING .h

```
...  
template < class any-type > ]  
class my_class {  
    ...  
    void my_function (...);  
    ...  
}
```

DEFINE .h / .cpp

```
...  
template < class any-type > ]  
void my_class < any-type > :: my_function (...){  
    ...  
}
```

DECLARE AN INSTANCE

```
...  
my_class < int > an_int_instance_of_my_class;  
my_class < float > a_float_...;
```

SEC 6.8 CONTAINERS

SEQUENTIAL
CONTAINER

$QList<T>$

$QList<QString>$
